

OPH - Order-Process-Hub

**Digital
Solutions.**

Precisely Tailored.

**Our solution
for order
processes
that are still
performed
manually.**

Digitized order processing between retailers and manufacturers.

The OPH helps to fully digitize the ordering process between manufacturers and retailers. The concept has been known for a long time, but has not yet been implemented by all partners. The OPH aims to complement existing EDI connections or other hub solutions to make digital ordering accessible to as many companies in the dental industry as possible - with only one connection per partner.

AI support allows smaller retailers to easily participate without a connection, eliminating the need for manufacturers to manually process orders. The OPH provides digital order capture, automatic order item verification, secure document sending and receiving, and comprehensive virus protection. This significantly increases efficiency and security.

OPH World

How your company benefits from OPH:

- **Digital order capture:** Fast and error-free reading of orders directly into your ERP system.
- **Automatic checking of order items:** In case of discrepancies, both parties are automatically notified by email.
- **Digital sending of outgoing documents:** Order confirmations, delivery notes, and invoices can be sent directly from your ERP.
- **Security:** All files from the OPH are newly generated, reduced to the necessary data for order processing, and additionally checked for viruses.
