All product data in one place –
accurate data at all times,
always available.

- All data is managed in one central location and efficiently digitized.
- Data can be maintained through a user-friendly interface.
- If needed, a direct connection to your ERP system can be established.
- Easily expand your master data into customer-oriented product data in any number of languages.

With the Product-Data Hub, you can supply your print catalogs, online shop, and dealers with the latest data – whether it's texts, images, or videos.

How your company benefits from the PDH:

- All product data centralized in one location.
- All channels, such as websites, dealers, and shops, can be supplied with data through the PDH.
- Simple and fast data management.
- Better findability of your products through optimized data management.
- Individually customizable to your company's needs.

Use the **Product-Data Hub** to efficiently manage and maintain your product data.

Increase productivity by ensuring your data is always current and accessible.
