We are
there for you

Quality you can rely on

Every product made under the DMG name is manufactured with care in Hamburg, strictly controlled and certified. The result: premium products you can rely on.

Dental solutions with the future in mind

Roughly 20 per cent of our team is dedicated to research and development. Whether it is digital workflows, modern restoration systems or prevention and early intervention, we work passionately to offer you attractive new possibilities.

Best worldwide network

DMG product solutions and services are valued in over 80 countries. In our international network of practices and research institutions, we engage in an intensive and personal exchange of ideas, and we cordially invite you to join in. Together, we can shape the future of dentistry!

Focus on sustainability

Sustainability is a cornerstone of our practices. This is reflected firstly through our resource-conserving measures, including photovoltaic systems, packaging reductions and the use of green electricity. As we are a family-run business in its second generation, for us sustainability also means: a responsible corporate policy geared towards the long term.

We give our all to lighten your load

There's no doubt about it: dentistry and dental technology are fascinating and diverse fields to work in – and extremely demanding ones

As a dentist, your commitment goes far beyond the treatment chair. Whether it is as someone for your patients and staff to turn to, as a listening ear or as a manager and business person. In the dental laboratory, it is important to remain faithful to traditional craftsmanship while incorporating the use of cutting-edge technology. Constantly having to tackle new challenges is a fundamental part of being a dentist or a dental technician.

At DMG, we give our all to help lighten your load.
And we have been doing so passionately for over 60 years.

A smile ahead together
Welcome to the DMG community

Knowledge for all – the DMG training portfolio

At DMG, we support you with a wide range of training courses as well as high-quality products. Whether it is talks, workshops or live treatment – with us, you can learn online, in our training centre or on your own premises.

On-site for you

Throughout the year, we have a presence at numerous trade fairs and congresses worldwide. We look forward to your visit and to having the chance to share ideas with you.

DMG Academy

Visit our digital platform, the DMG Academy, to complete training on various topics at any time. The courses are free of charge and are available to dentists, dental assistants and dental technicians.

You can find dates and information here:

dmgdental-academy.com

Interdentale

Interdentale is the event series made especially for young dentists. With innovative lectures and workshops – online and on-site!

Dental dreamwork: our solutions for dental clinics and laboratories are no dream, but an everyday reality.

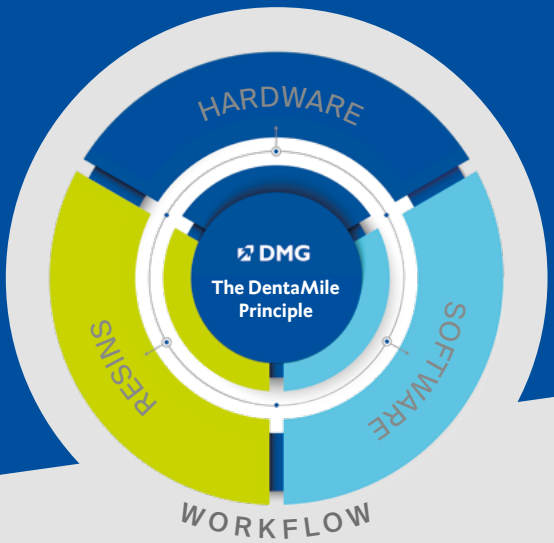
Whether just getting into digital or already experienced in 3D: DMG's DentaMile makes it easier than ever to take advantage of dental 3D printing. Dental clinics and laboratories turn into a dental dream team thanks to a custom digital workflow that significantly improves patient satisfaction.

It's a match!

Flexible, fast and **well** connected

With DMG DentaMile, you decide for yourself how to use the digital workflow – even without your own 3D printer. Manufacture precise bite splints, dental models or bleaching trays with 3D printing? Fast, easy and economically efficient?

With the DentaMile connect software and the validated workflows, it couldn't be simpler. You can design and print the objects yourself or delegate them to a partner with whom you are networked in the cloud or to DMG's Design & Print Service. The DentaMile network opens up new and economically convincing possibilities.



3D from a single source

An integrated approach: the DMG DentaMile portfolio offers you all the components for modern 3D dental printing from a single source. From the cloud-based software DentaMile connect, via high-performance 3D printers and post-processing units, to high-quality materials for a wide variety of applications.

Scanned, designed, printed, delivered: **DentaMile Design & Print Service**

With our DentaMile Design & Print Service, you are given tailored solutions to meet your needs. You can use our DentaMile Print Service and have us print out your designs in 3D. Or use the Design Service as well, and we will also design the objects for you.

3D the way I want it.

Would you like more information on 3D printing?
www.dentamile.com/en

Don't have a printer of your own?
No problem!
Don't have time to design yourself?
No problem!

The cloud software that **overcomes technical barriers**

DentaMile connect enables easy networking of all parties involved in the production process: people, instruments and technologies. Without spatial or technical barriers. Simple and efficient.

The cloud-based software developed by DMG simplifies 3D printing so that the technology can easily be completely integrated into everyday work.

DentaMile connect also ensures that the workflow in medical device manufacturing is secure and can be validated. Errors are minimised and new applications are made accessible without requiring any additional technical effort.

3D the way I want it: the flexible DentaMile usage options

Printing your own 3D models? Networking with a dentist or a partner laboratory? Just scanning? Or designing digital models as well? No matter how, you can participate in the digital workflow – even without your own 3D printer. The DentaMile connect software's flexible usage model offers you an outstanding range of possibilities, with four different usage options. You decide what you want to do and which option is right for your needs.

- **Cloud-based:** physical distance is not an issue
- **»Smart Connectivity«** for networking entire systems
- Control of all processing and fabrication procedures with one software: **design, slicing, printing and post-processing**
- **Intuitive, easy to use**
- **Flexible: four usage options**, depending on your individual needs

Validated and efficient: DentaMile workflows for bite splints and bleaching trays

Manufacture precision-fit bite splints or bleaching trays with 3D printing? Fast and efficient? Of course! DentaMile connect and the validated DentaMile workflows help you optimise workflows and achieve even more precise results. The holistic workflows take into account all process steps and components involved. Handling is made as user-friendly as possible. The validated processes guarantee the reliable quality of the printed items.

DentaMile workflows: concrete advantages for dental practices, laboratories and patients

High wearing comfort for the patient
Because of the thin material and optimal fit, the bite splint offers a very high level of wearing comfort

Smarter working
To the printed item in just a few steps, with simple, intuitive handling. Precise design becomes easier than ever.

Highly aesthetic
Barely visible, colourless transparency of the bite splints

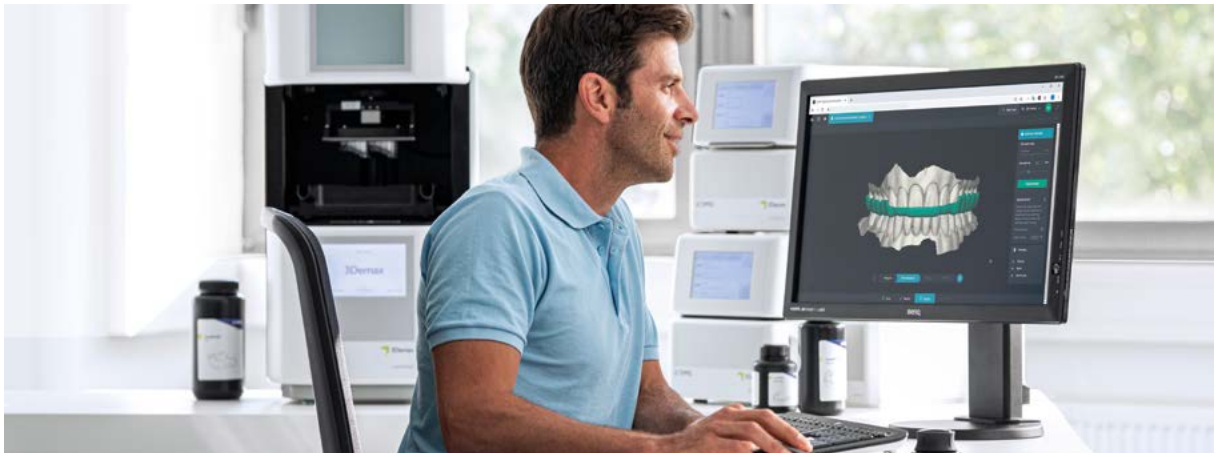
DentaMile connect



The cloud-based software DentaMile connect facilitates the simple networking of all parties involved in the production process, with no spatial or technical barriers

Product benefits

- Encryption of patient data with the latest cloud technology from Microsoft Azure
- Consistent logging of workflows
- Software takes into account interaction between materials and manufacturing method.
- Users can get started immediately – no major training necessary
- Time savings thanks to helpful default settings and automation
- Control of all processing and fabrication procedures with one software: design, slicing, printing and post-processing
- Consistent, MDR-compliant logging of workflow

DentaMile Desk MC-5

Compact 3D printer for easy digital workflow entry

Technical data

External dimensions: 300 x 400 x 422.6 mm; Weight: 16 kg; Build area (W/D/H): 130 x 73,1 x 90 mm; Technology DLP @385 nm; Native pixel: 68 µm; connections: 2 USB ports, 1 LAN port, 1 mains connection outside; Additional information: 2K light engine, 5” colour touch display, WLAN and LAN, High-precision image alignment and orientation correction process

Product benefits

Benefits of the 3D printer

- Compact size
- Suitable for a wide spectrum of dental 3D applications
- High precision
- Outstanding price-performance ratio

Benefits in use

- User-friendly and simple user guidance
- Cover open on three sides for a larger working space
- Intelligent networking with DentaMile connect
- Compatible with all standard dental CAD programs (STL files)

Benefits in safety

- Reproducible results thanks to a software-supported, validated application
- Reliable service structure
- Developed, quality-tested and calibrated in Germany

Packaging

1 DMG DentaMile Desk MC-5 REF 170500

DentaMile Wash MC

Simple cleaning unit for the systematic and standardised cleaning of printed objects according to manufacturer specifications

Technical data

External dimensions (W/D/H): 320 x 330 x 246 mm; Volume: 140 x 140 x 120 mm; Power supply unit: 12 V, 2 A external adapter; Additional information: 2.4” TFT touchscreen

Product benefits

- Designed for numerous wash cycles
- Removable basket
- Magnetic mixer
- Fast and fully automatic cleaning of the 3D-printed objects
- Preset cleaning programmes
- Colour touch display with simple user guidance
- Guaranteed efficient use of the cleaning fluids

Packaging

1 DMG DentaMile Wash MC REF 170501

DentaMile Cure MC

Simple post-curing unit for final curing with validated parameters for a reliable end product

Technical data

External dimensions (W/D/H): 320 x 330 x 246 mm; Volume (W/D/H): 145 x 145 x 105 mm; Heating: Eco-passive up to 60 °C; Interface: 2.4" TFT touchscreen connection: 2.4 GHz WiFi; further information: Colour touch display with preset light-curing programs; LED technology (365 nm and 405 nm)

Product benefits

- UV illumination with exclusive omni 360° technology for uniform curing
- Triple-frequency technology with 3 wavelengths (365 nm, 385 nm, 405 nm)
- Suitable for various light-curing synthetic resins
- Fully automatic material curing programs
- Protection from UV radiation due to opaque walls and safety OFF system
- Network connectivity

Packaging

1 DMG DentaMile Cure MC REF 170502

DentaMile Desk RS-1

The elegant and compact solution for dental 3D manufacturing

Technical data

External dimensions (W/D/H): 320 x 375 x 300 mm (with closed lid), 320 x 375 x 391 mm (in print mode); Build space: 133 x 75 x 100 mm; Wavelength: 385 nm; Max. workpiece height: 90 mm; resolution Full HD: 69 µm pixel size; Z resolution: 25-150 µm; Connectivity: WLAN, LAN, USB; Weight approx. 9 kg

Product benefits

- Force Feedback technology: optimises the printing process by actively managing platform speed for reliable prints
- Certified auto-calibration: Ensures consistent light intensity and print quality
- RFID material identification: Monitors the compatibility of the material and its expiry date
- Compact design: For flexible placements

Packaging

1 DMG DentaMile Cure MC REF 170502

DentaMile Desk RS 5

High-precision, high-speed 3D printer for a wide range of dental 3D printing applications

Technical data

External dimensions (W/D/H): 335 x 349 x 541 mm; Build area (W/D/H): 130 x 75 x 115 mm; Max. workpiece height: 115 mm; Native pixel +/- 34 µm; Connections: WLAN, TCP/IP, USB; Weight: approx. 33 kg

Product benefits

- Suitable for a wide spectrum of dental 3D applications
- Force Feedback option
- Large build area for the simultaneous manufacturing of several workpieces
- Exceptionally high processing speed
- Precision without compromise
- Simple, material-saving handling and user guidance
- Validated process for reproducible printing results
- Safety via material identification (RFID)
- Intelligent networked workflow in combination with 3Dewash and 3Decure
- Compatible with all standard dental CAD programs (STL files)
- Outstanding price-performance ratio
- Reliable service structure

Packaging

1	DMG 3Demax printer	REF 170315
1	DMG 3Demax printer with Force Feedback	REF 170355

DentaMile Wash RS

Cleaning unit for the systematic and standardised cleaning of printed objects according to the manufacturer's instructions as part of the supported process reliability

Technical data

External dimensions (W/D/H): 230 x 450 x 270 mm; Volume: 130 x 75 x 60 mm; Processing time between 4 and 8 minutes, depending on material; cleaning material: isopropyl alcohol; others according to material specifications; connections: WLAN/LAN

Product benefits

- Fully automatic cleaning in 4-8 minutes
- No contact with sticky resins and cleaning fluids
- Validated workflows
- Touch-display control
- Computer-controlled programs ensure the most effective use of cleaning fluids

Packaging

1	DentaMile Wash RS cleaning unit	REF 170316

Accessories

3	DentaMile Wash RS cleaner swap box	REF 170345
6	Empty bottles @ 800 ml for LuxaPrint Clean IPA	REF 170343

DentaMile Cure RS

Light curing unit for final curing as part of a monitored, controlled process

Technical data

External dimensions (W/D/H): 230 x 380 x 270 mm; Volume: 130 x 75 x 60 mm; Processing time depending on material; Connections: WLAN/LAN, USB

Product benefits

- Fully automatic material curing programs
- Integrated touchscreen
- Network connectivity
- 360° lighting
- Can be stacked with DMG 3Dewash

Packaging

1	DMG 3Decure post-processing unit	REF 170317

DentaMile Cure RS-XL

The high-performance post-curing unit for the series production

Technical data

External dimensions (W/D/H): 650 x 800 x 1050 mm; Volume: 470 x 375 x 280 mm; Processing time: depending on material; Connections: WLAN/LAN, USB; Weight approx. 150 kg

Product benefits

- Large volume: Enables the simultaneous post-curing of multiple printed components (up to 36 models at the same time)
- 360° curing: Ensures uniform post-curing of all surfaces of the printed object
- Modern vacuum technology: Shortens post-curing times while maintaining high quality
- Gas free: The use of vacuum means that no gas is required during operation, which significantly reduces operating costs
- Fully automatic material curing programs
- Integrated touchscreen
- Network connectivity
- Easy calibration with ACCS sensor to ensure functionality
- 360° UV lighting for uniform curing

Packaging

1	DMG DentaMile Cure RS-XL 230V	REF 170420
2	DMG DentaMile Cure RS-XL 120V	REF 171420

DMG Lab5

The professional printer for high volumes and efficiency

Technical data

External dimensions (W/D/H): 600 x 570 x 1660 mm; building platform (W/D): 231 x 130Z mm; Max. work-piece height: 300 mm; Native pixel +/- 30 µm; Connections: WLAN, TCP/IP, USB; Weight|: 110 kg; Resolution: 4K (3840 x 2160 pxl) with 385 nm LED

Product benefits

Superior technology

- Professional high-precision 4K light source
- Print chamber can be heated up to 35 °C
- Integrated force feedback system
- LED status bar
- Motorised hood can be opened and closed via foot sensor

Efficient application

- Very large build area for the simultaneous production of several workpieces
- Exceptionally high processing speed
- Precision without compromise

Maximum safety

- Software-supported, validated application creates reproducible dental device results
- Safety via material identification (RFID)
- Compatible with all standard dental CAD programs (STL files)

Packaging

1 DentaMile Lab5 Printer REF 170352

DentaMile Lab5 Pro

The automated professional printer for high quantities and efficiency with an automatic refill and separation function (ASM) of the finished printed items

Technical data

External dimensions (W/D/H): 600 x 570 x 1660 mm; building platform (W/D): 231 x 130 mm; Max. workpiece height: 300 mm or 100 mm (when using ASM); Native pixel +/- 30 µm; Connections: WLAN, TCP/ IP, USB; 120 kg; Resolution: 4K (3840 x 2160 pxl) with 385 nm LED

Product benefits

The DMG DentaMile Lab5 Pro offers superior technology, efficient application and maximum safety (for details, see DMG DentaMile Lab5)

Speciality

Automatic refill and disconnect function (ASM)

Packaging

1 DentaMile Lab5 Pro Printer with ASM REF 170353

LuxaPrint Ortho Comfort

Light-curing 3D print resin

Indication: Additive manufacture of occlusal splints. Classified as a Class IIa medical device

Shade: Transparent

Product benefits

- Extremely resilient, yet flexible
- Very comfortable to wear
- Material can be printed thinly
- Increased material flexibility in the mouth
- Easy to use even at room temperature
- Tasteless and odourless
- Resistant to discolouration

Pack

385 nm

1 Bottle @ 5000 g, shade Transparent	REF 170277
1 Bottle @ 2000 g, shade Transparent	REF 170275
1 Bottle @ 1000 g, shade Transparent	REF 170255
1 Bottle @ 500 g, shade Transparent	REF 170253
1 Bottle @ 200 g, shade Transparent	REF 170251

LuxaPrint Ortho Flex

Light-curing 3D print resin

Indications: Additive fabrication of flexible trays in the digital workflow. Classified as a Class I medical device

Shade: Transparent

Product benefits

- Versatile
- Optimal elasticity
- Highly tear-resistant and unbreakable
- Near-natural transparency
- Easy to clean

Pack

385 nm

1 Bottle @ 5000 g, shade Transparent	REF 170284
1 Bottle @ 2000 g, shade Transparent	REF 170281

1 Bottle @ 500 g, shade Transparent	REF 170250
1 Bottle @ 200 g, shade Transparent	REF 170273

LuxaPrint Ortho Plus

Light-curing 3D print resin
Indication: manufacture of splints and orthodontic appliances. Classified as a Class IIa medical device

Shade: Transparent

Product benefits
- Clear transparent
- Exact fit
- Not brittle

Pack
385 nm

1	Bottle @ 5000 g, shade Transparent	REF 170216
1	Bottle @ 2000 g, shade Transparent	REF 170215

LuxaPrint Ortho

Light-curing 3D print resin
Indications: Manufacture of individual surgical templates with maximum precision and orthodontic appliances. Classified as a Class I medical device

Shade: Transparent

Product benefits
- Exact fit of the drilling sleeve
- Drilling template in accurate position
- Clear transparent, for perfect control
- »Unobstructed View« of the surgical field
- Autoclavable, for high hygiene standards

Pack
385 nm

LuxaPrint Model

Light-curing 3D print resin
Indication: Manufacturing of dental models using 3D printing. The printed model is suitable for producing thermoformed splints

Colours: Beige, Grey, Ivory, Transparent

Product benefits
- Finest surface structure for perfect identification of details
- Dimensional stability
- Precise

Pack
385 nm / 405 nm

1 Bottle @ 2000 g, shade Beige	REF 170265

Prevention and early intervention

Bleaching

Prophylaxis

Infiltration

Flairesse Bleaching Gel CP 5% and 10%

A game changer for the treatment of developmental enamel opacities

Indications: Treatment of developmental enamel defects in children, whitening of intrinsic and extrinsic discolouration due to various causes

Product benefits

- At-home bleaching for use with a custom tray
- Approved medical product
- Suitable for young patients
- Supportive treatment of developmental enamel opacities
- Conditioning of the protein-rich lesions for infiltration treatment
- Especially mild formulation with 5 % and 10 % carbamide peroxide (CP)
- Gentle whitening of opacities with yellowish or brownish opacities
- Bonds to the tray effectively and does not run
- Contains xylitol and potassium nitrate
- 1-8 hours of wearing per day
- Achieves the material properties required by DIN EN ISO 28399 with daily application over the course of 10 days

Starter pack

1 Syringe @ 5 ml
1 Tray box

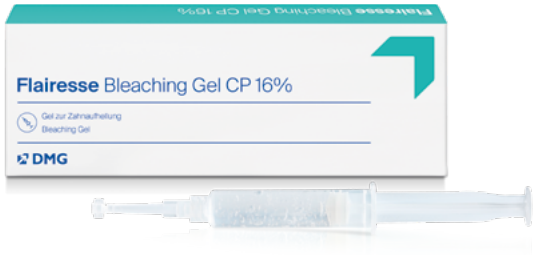
Flairesse Bleaching Gel CP 5%	REF 220550
Flairesse Bleaching Gel CP 10%	REF 220551

Refill pack

1 Syringe @ 5 ml

Flairesse Bleaching Gel CP 5%	REF 220552
Flairesse Bleaching Gel CP 10%	REF 220553

Flairesse Bleaching Gel CP 16%



Cosmetic bleaching gel for gentle whitening

Indications: Gentle whitening of intrinsic and extrinsic discolouration

Product benefits

- At-home bleaching for use with a custom tray
- Mild formulation with 16 % carbamide peroxide (CP) for gentle whitening
- Bonds to the tray effectively and does not run
- Contains xylitol and potassium nitrate
- 1-8 hours of wearing per day
- Achieves the material properties required by DIN EN ISO 28399 with daily application over the course of 10 days

Starter pack

1 Syringe @ 5 ml Flairesse Bleaching Gel CP 16%
1 Tray box REF 310000

Refill pack

1 Syringe @ 5 ml Flairesse Bleaching Gel CP 16% REF 310001

Flairesse Paste

Tooth cleaning and polishing paste for professional tooth cleaning (PTC) and polishing of tooth surfaces as part of a prophylactic treatment
Indications: removal of superficial soft and hard plaque, removal of extrinsic stains

Product benefits

- For a perfect cleaning and polishing effect
- Does not splatter
- 3 degrees of abrasion: fine, medium, coarse
- Contains xylitol and fluoride (12,300 ppm)
- Two fresh flavours: Mint and Melon

Pack

200 Single-use unit @ 1.8 g
1 Prophy ring

Mint fine	REF 220414
Mint medium	REF 220415
Mint coarse	REF 220416

1 Tube @ 75 ml

Mint fine	REF 220417
Mint medium	REF 220418
Mint coarse	REF 220419
Melon fine	REF 220423
Melon medium	REF 220424
Melon coarse	REF 220425

Flairesse Gel/Foam

Prophylaxis gel and foam for final treatment as part of professional tooth cleaning (PTC) and for integration into an individual prevention plan
Indications for gel and foam: promotes remineralisation of the enamel after professional tooth cleaning, remineralisation of incipient caries

Product benefits

- Increases enamel resistance against acid attacks
- Contains xylitol and fluoride (12,300 ppm)
- Does not drip
- Short application time: only 1 minute
- Can be used in a tray
- Three fresh flavours: Mint, Melon, and Strawberry

Pack

1 Bottle @ 480 ml Gel

Mint	REF 225411
Melon	REF 225412
Strawberry	REF 225413

1 Dispenser @ 125 g Foam

Mint	REF 220408
Melon	REF 220409
Strawberry	REF 220410

Flairesse Varnish

Moisture and saliva-tolerant prophylaxis varnish
Indications: Treating hyper-sensitive teeth, sealing overly sensitive tooth necks and exposed root dentine surfaces, as a protective coating to prevent caries, remineralisation of incipient caries

Product benefits

- Reliably eliminates hypersensitivity
- Contains xylitol and fluoride (22,600 ppm)
- Invisible on teeth
- Easy to use
- Two fresh flavours: Mint and Melon

Pack

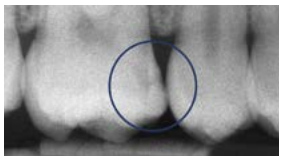
35 Single-use units @ 0.4 ml

Mint	REF 220404
Melon	REF 220405

Icon Proximal

Caries infiltrant for micro-invasive treatment of carious lesions in the proximal region

Indication: micro-invasive treatment of early, non-cavitated caries in the proximal area (maximal radiological lesion progression into the outer third of dentine)



Product benefits

- Stops caries at an early stage in the hard-to-reach interdental space
- Microinvasive, gentle treatment
- Preserves healthy tooth structure, tooth is given a longer life expectancy
- Comfortable for patients: no need for anaesthesia or drilling

1 Treatment unit contains:

1 Syringe @ 0.45 ml Icon Etch; 1 Syringe q 0.45 ml Icon Prime;
1 Syringe @ 0.45 ml Icon Infiltrant; 6 Icon Proximal Tips; 1 Luer-Lock Tip;
4 Icon Wedges

Starter pack
1 Treatment unit — REF 220523

Pack
2 Treatment units — REF 220524

Economy pack

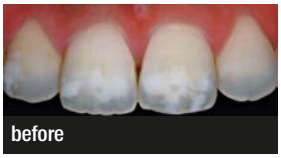
Icon Vestibular

Infiltrant for aesthetic treatment for developmental enamel opacities

Indications: minimally invasive treatment of non-cavitated carious enamel lesions, aesthetic treatment of developmental enamel opacities such as caries-related white spots, MIH, fluorosis and trauma



Product benefits

- Minimally invasive treatment
- Gentle, pain-free and substance-preserving
- For MIH, caries-related white spots, fluorosis and trauma
- Effectiveness clinically proven in over 400 studies
- A holistic treatment plan: optimise infiltration treatment with medical bleaching and transillumination

1 Treatment unit contains:

1 Syringe @ 0.45 ml Icon Etch; 1 Syringe @ 0.45 ml Icon Prime;
1 Syringe @ 0.45 ml Icon Infiltrant; 6 Icon Vestibular Tips;
1 Icon Capillary Tip

Starter pack
1 Treatment unit — REF 220520

Pack
2 Treatment units — REF 220521

Economy pack
7 Treatment units — REF 220522

Refill pack
3 Syringes @ 0.45 ml Icon Etch — REF 220530
3 Syringes @ 0.45 ml Icon Prime — REF 220531
3 Syringes @ 0.45 ml Icon Infiltrant — REF 220532
20 Icon Vestibular Tips — REF 220533
20 Icon Proximal Tips — REF 220534
20 Icon Capillary Tips — REF 220535
50 Icon Wedges — REF 220536

DMG MiniDam

Silicone gingiva protection
Indication: silicone protection to facilitate a dry environment in the proximal area between two teeth to protect the gingiva against dental materials

Product benefits

- Reliable local protection of the proximal area
- Quick and easy
- Comfortable for patients
- Secure hold without clamps
- Latex-free
- Assists with infiltration treatment

Pack
20 Pcs REF 220381

Direct composite fillings

Composite

Glass ionomer cement

Underfilling material

Bonding agent

Core build-up material

Root posts

Accessories

Ecosite Elements

Nano-hybrid composite system for the anterior and posterior region

Indications: loss of tooth substance caused by caries, fractures, dental wear or impaired development; diastema, tooth discolouration or slight misalignment of the front teeth; dental or primary and secondary prevention of caries

Product benefits

- Innovative and modular shade system
- Exceptional handling thanks to NC1 technology
- Optimum consistency for simple and rapid modelling
- Rapid adaptation to the cavity walls thank to the Push-and-Flow effect
- Rapid high-gloss polishing for gleaming shine
- New: the light shades A1 and Bleach Light

Starter pack

80	Safetips @ 0.25 g Ecosite Elements Pure shades (16 of each): B1, A1, A2, A3, A3.5	REF 220861
5	Syringes @ 4 g Ecosite Elements Pure shades: B1, A1, A2, A3, A3.5	REF 220860

Ecosite One

Stopperable one-shade nano-hybrid composite for the posterior region

Indications: fillings in the posterior region (classes I and II including replacement of individual cusps), class V fillings (cervical caries, root erosion, conical defects), core build-ups, deciduous teeth fillings, extended crack fillings on molars and premolars

Product benefits

- Thanks to special one-shade technology, all common tooth colours can be economically and aesthetically supplied with a universal colour
- Reliable and complete curing to 3 mm
- Exceptional handling thanks to DMG's proprietary NC1 technology
- Easy modeling and precision contact point formation
- In most cases no blocker / opaquer necessary
- Outstanding mechanical properties thanks to special filler technology
- Excellent polishability

Pack

1	Syringe @ 4 g	REF 220900
16	Safetips @ 0.25 g	REF 220901

Ecosite Bulk Fill

Packable nano-hybrid composite

Indications: fillings in the posterior region (classes I and II including replacement of individual cusps), class V fillings (cervical caries, root erosion, conical defects), core build-ups, deciduous teeth fillings, extended crack fillings on molars and premolars

Product benefits

- Can be applied in one layer without an additional top layer
- Reliable and complete curing to 5 mm
- Low shrinkage stress values
- Easy modelling
- Precision contact-point formation
- Outstanding mechanical properties thanks to special filler technology
- Excellent polishability

Pack

16	Safetips @ 0.25 g	
	Shade Light	REF 220755
	Shade Universal	REF 220756
	Shade Contrast	REF 220757
1	Syringe @ 4 g	
	Shade Light	REF 220752
	Shade Universal	REF 220753
	Shade Contrast	REF 220754

Accessories

1	Safetip Dispenser	REF 213122
1	Safetip Dispenser Pro	REF 220829

Constic

3-in-1 flow composite: etching, bonding and filling in one single step

Indications: small class I and III restorations, class V restorations, sealing of fissures, extended sealing of fissures, underfilling of class I–II restorations, blocking out and filling of undercuts in cavities, small occlusal cavities in deciduous teeth

Product benefits

- Self-etching and self-adhesive
- Faster, easier and more efficient treatment process
- Radiopacity and tooth-like fluorescence
- Prevents postoperative sensitivities
- Minimises potential sources of mistakes
- Contains MDP

Pack

2	Syringes @ 2 g	
1	Brush holder	
20	Clip-on Brushes	
20	Luer-Lock Tips Silver	
	Shade A1	REF 220700
	Shade A2	REF 220701
	Shade A3	REF 220702

Accessories

20	Clip-on Brushes	
20	Luer-Lock Tips Silver	REF 220712

EcuSphere Flow

Light-curing flowable universal composite

Indications: small restorations (cavity classes I, III, IV, V), cavities in deciduous teeth, minimally invasive fillings, underfillings; extended fissure sealing, blocking out and filling of undercuts, repair of composite restorations

Product benefits

- Low-viscosity: fluid during and stable after the application
- Direct application
- Excellent polishing properties
- Natural fluorescence

Speciality

Can be applied as a single shade and multi-shade; perfectly compatible with all EcuSphere products

Pack

2	Syringes @ 1.5 g	
10	Luer-Lock Tips	
	Shade A1	REF 220315
	Shade A2	REF 220314
	Shade A3	REF 220313
	Shade A3.5	REF 220312

Accessories

60	Luer-Lock Tips Black	REF 211477

EcuSphere Carat

Light-curing packable composite for posterior regions

Indications: restorations of all cavity classes, especially classes I and II; manufacture of direct inlays and onlays

Product benefits

- High viscosity: good for packing
- Excellent handling
- Does not stick to the instrument
- Good adaptation to cavity walls
- Excellent stability
- Natural fluorescence

Speciality

Recommended for posterior applications

Pack

20	Safetips @ 0.3 g	
	Shade A1	REF 220323
	Shade A2	REF 220271
	Shade A3	REF 220322
	Shade A3.5	REF 220270
1	Syringe @ 3 g	
	Shade A1	REF 220287
	Shade A2	REF 220267
	Shade A3	REF 220285
	Shade A3.5	REF 220266

Accessories

1	Safetip Dispenser	REF 213122
1	Safetip Dispenser Pro	REF 220829

EcuSphere Shape

Light-curing universal composite

Indications: restorations of all cavity classes in the anterior and posterior region

Product benefits

- Medium viscosity: good modelling properties
- Great variety of shades
- Excellent sculpting properties
- Single and multi-shade layer technique
- Natural fluorescence
- Excellent polishing properties

Pack

20	Safetips @ 0.3 g	
	Shade A1	REF 220327
	Shade A2	REF 220309
	Shade A3	REF 220307

	Shade A3.5	REF 220297
	Shade A4	REF 220347
	Shade B1	REF 220335

Accessories

1	Safetip Dispenser	REF 213122
1	Safetip Dispenser Pro	REF 220829

DeltaFil

Conventional, self-adhesive glass ionomer cement with an innovative material concept

Indications: permanent restoration: Class I, II* and V; including for sandwich technique; temporary restoration: Class I, II, III and V; Deciduous tooth: Class I, II, and III; extended fissure sealing; base/liner; core build-up

* Suitable for areas subject to occlusal load, provided the isthmus measures less than half of the intercuspal area.

Product benefits

- Increased flexural strength and fracture toughness thanks to innovative and patented micelle technology
- Ideal for difficult isolation, restricted patient cooperation and a difficult-to-access cavity
- Easy to use, no absolute drying necessary
- Self- adhesive – no bonding necessary
- Range of shades (White and Dark) adapted to suit specific patient group

Starter pack

1 Bottle @ 15 g powder
1 Bottle @ 8 g liquid, mixing palette, measuring spoon

Shade A1	REF 520030	Shade A4	REF 520034
Shade A2	REF 520031	Shade White	REF 520045

Pack

50 Applicap @ 370 mg , powder, 75 mg liquid (0.07 ml)

Shade A1	REF 520000	Shade A4	REF 520004
Shade A2	REF 520001	Shade White	REF 520005
Shade A3	REF 520002	Shade Dark	REF 520006

Refill pack

1 Bottle @ 15 g powder

Shade A1	REF 520035	Shade A4	REF 520039
Shade A2	REF 520036	Shade White	REF 520047
Shade A3	REF 520037	Shade Dark	REF 520048

1 Bottle @ 8 g liquid REF 520040

Accessories

1 Capsule Dispenser REF 520051
1 Bottle @ 8 g DeltaFil Conditioner REF 520020

DeltaFil Coat

Light-curing, TPO- and MMA-free protective coating for glass ionomer cements

Indications: protection of glass ionomer restorations

Product benefits

- Protects the glass ionomer cement from drying out and from being contaminated with moisture
- Ensures optimal surface quality and lustre
- Reduces the need for fine polishing
- Improves the aesthetics of the restoration

Pack

1 Bottle @ 5 g DeltaFil Coat REF 520050

Accessories

50 Single-use Brushes White REF 109320

DeltaFil Conditioner

Polyacrylic acid solution for removing the smear layer after preparation and conditioning the cavity

Indications: conditioning of the cavity and treatment of the smear layer in DeltaFil restorations

Product benefits

- Optimises the bond between DeltaFil and the tooth structure
- Ensures high durability of the restoration

Pack

1 Bottle @ 8 g	REF 520020

Ionosit Baseliner

Light-curing underfilling material for improved longevity of restorations

Indications: base/liner material for composite restorations, and for blocking out undercuts

Product benefits

- Gap-free restorations
- Compensation of polymerisation shrinkage
- Continuous fluoride release
- Antibacterial properties (due to zinc content)
- No complicated handmixing
- Protects the pulp
- Seals the dentine tubules
- Prevents postoperative sensitivities
- Radiopaque

Speciality

Also available as a Saferinge for easier and faster application

Pack

3 Saferinges @ 0.33 g	REF 220091
2 Syringes @ 1.5 g	REF 213002

Economy pack

20 Saferinges @ 0.33 g	REF 209538
6 Syringes @ 1.5 g	REF 213001

Accessories

60 Luer-Lock Tips Black	REF 211477

LuxaBond Universal

Dual curing two-bottle universal adhesive system. Can also be used as a primer for indirect restorations

Indications:
As an adhesive: for direct restorations using light-curing composites and compomers, light-curing fissure-sealing materials, build-up materials (light, self, dual-curing), cementing indirect restorations and root posts with composite based luting cements (light, self, dual-curing), cementing veneers with adhesive composites using the melt etching technique
As a primer: for indirect metal restorations (precious and non-precious metals), zirconia/aluminium oxide, silicate ceramics and composites

Product benefits

- Truly comprehensive in every respect
- Contains MDP
- Strong adhesion
- Minimises sources of error
- Study-demonstrated clinical use with superior adhesion

The ideal partner for optimum bonding: PermaCem Universal (page 62), LuxaCore Z Dual (page 38)

Pack

1 Bottle @ 5 ml Bond A
1 Bottle @ 4.5 ml Bond B
50 Single-use Brushes White
25 Endo Brushes
1 Mixing palette — REF 213379

Accessories

50 Single-use Brushes White — REF 107291
25 Endo Brushes Black — REF 212386

LuxaBond Total Etch

THE DENTAL ADVISOR 2011 Preferred Products

DENTAL ADVISOR ++++

Dual-curing adhesive system designed for all direct and indirect techniques

Indications: dual-curing bonding agent, in combination with the total etch technique, on enamel and dentine for all direct and indirect techniques, such as challenging adhesive cementations of root posts and core build-ups, inlays, onlays, crowns and bridges

Product benefits

- Self-curing: hardens even without light
- No premature polymerisation of bonding »pools«
- Pre-bond for quick curing of the bonding agent in the dentine: superior adhesion values, longer working time with the bonding agent
- Does not contain acetone

Speciality

Ideal as a partner of LuxaCore Z Dual (page 38), PermaCem (page 63), PermaCem Dual (page 63)

Starter pack

1 Bottle @ 5 ml Pre-bond
1 Bottle @ 5 ml Bond A
1 Bottle @ 5 ml Bond B
1 Syringe @ 2 ml DMG Etching Gel
25 Endo Brushes Red
25 Endo Brushes Black
3 Luer-Lock Tips White
1 Mixing palette — REF 212384

Refill pack

1 Bottle @ 5 ml Pre-bond — REF 212389

Accessories

25 Endo Brushes Red — REF 212385
25 Endo Brushes Black — REF 212386
50 Luer-Lock Tips White — REF 109942

Ecosite Bond

Light-curing universal adhesive
Indication: bonding agent for direct restorations of all cavity classes with light-curing composites, compomers and ormocers

Product benefits
- Freedom of choice when it comes to the etching mode: self-etch, total etch, selective etch
- Contains MDP
- Optimum bonding properties in every situation
- Perfect as a partner for Ecosite One, Ecosite Elements, Ecosite Bulk Fill and Vitique

Pack
1 Bottle @ 5 ml Ecosite Bond
50 Single-use Brushes White — REF 220758

Accessories
50 Single-use Brushes White — REF 107291

Contax

DENTAL ADVISOR ++++½
2025 REALITY RATINGS & REVIEWS Four Star Award ★★★★

Self-etching and self-conditioning adhesive system
Indication: light-curing adhesive system for light-curing restorative materials to be used on dentine and enamel

Contax with activator to mix with Contax Bond
Indication: can be used with all self and dual-curing restoratives

Product benefits
- No additional etching
- Priming and bonding in just two steps
- Secure long-term adhesion because of separate priming step
- Reliable depth of demineralisation
- Water-based primer, thus tolerant as regards technique
- No postoperative sensitivities

Speciality
Contax must always be light-cured, even when used with the activator

Starter pack
1 Bottle @ 5 ml Primer
1 Bottle @ 5 ml Bond
50 Single-use Brushes White
50 Single-use Brushes Red
1 Mixing palette — REF 220263

Starter pack + activator
1 Bottle @ 5 ml Primer
1 Bottle @ 5 ml Bond
1 Bottle Activator (5 ml)
50 Single-use Brushes White
50 Single-use Brushes Red

Accessories
50 Single-use Brushes White — REF 107291

LuxaCore Z Dual

Dual-curing material for root post cementation and core build-up

Indications: Core build-up, post cementation

Product benefits

- Dentine-like trimmability: score-free preparation
- Particularly high compressive strength: high stability under the crown
- Excellent flow properties: optimum adaptation
- Dual-cure: flexible working
- Immediate high final hardness
- Direct application with Intraoral Tips and Endo Tips: specially designed for root canals
- Available in three shades

Pack

LuxaPost

Glass fibre-reinforced pre-silanised composite root post
with dentine-like flexural modulus
Indication: manufacture of a reliable retention of the core build-up in cases of insufficient coronal tooth substance

Product benefits

- Perfect partner for LuxaCore Z Dual: monoblock
- Dentine-like flexural modulus: reduced risk of root fracture
- Radiopaque
- Pre-silanised
- Gentle on the tooth substance thanks to tapered form
- One effective drill head for each size: no pre-drilling required
- Highly aesthetic

Starter pack

Safetip Dispenser

Dispenser for direct application of all commercially available composite tips

Product benefits

- Safe loading of Safetips
- Direct application
- Hygienic application
- Autoclavable
- Ergonomic handling

Speciality

The following products can be used with the Safetip Dispenser:

- Ecosite Elements
- Ecosite Bulk Fill
- Ecosite One
- EcuSphere Carat
- EcuSphere Shape
- DMG Retraction Paste

Pack
1 Safetip Dispenser REF 213122

Safetip Dispenser Pro

High-quality dispenser for ergonomic, direct application of all commercially available composite tips

Product benefits

- Easy dispensing thanks to parallel handles
- Precise treatment through straight-line motion
- Ergonomic handling, even for smaller hands
- High-quality materials and processing
- Secure insertion of Safetips via metal locking mechanism
- Hygienic application
- Autoclavable

Speciality

The following products can be used with the Safetip Dispenser:

- Ecosite Elements

LuxaFlow Star

2025 REALITY RATINGS & REVIEWS Four Star Award ★★★★

Flowable light-curing composite

Indications: enhancement and repair of bis-acrylate temporaries; small class III, IV and V cavity fillings; minimally invasive fillings; underfillings

Product benefits

- Natural fluorescence
- Excellent polishing properties
- Luer-Lock Tips for precise and direct applications
- Fluid during the application and stable thereafter
- Radiopaque

Starter pack

4 Syringes @ 1.5 g
20 Luer-Lock Tips Black
Colours: A1, A2, A3.5, B1 — REF 214000

Refill pack

2 Syringes @ 1.5 g
10 Luer-Lock Tips Black

Shade A1	REF 214001
Shade A2	REF 214002
Shade A3	REF 214003
Shade A3.5	REF 214004
Shade B1	REF 214005

Accessories

60 Luer-Lock Tips Black — REF 211477

Luxatemp Glaze & Bond

Light-curing varnish for repairing and sealing temporary crowns and bridges

Indications: coating and repairing of provisional crowns and bridges, primer for indirect restorations made of PEEK/composite and PMMA

Product benefits

- High gloss without polishing
- Excellent bond with repair materials
- High abrasion resistance
- Low surface roughness

Pack

1 Bottle @ 5ml
25 Brushes
1 Mixing palette — REF 211927

Accessories

50 Brushes — REF 110041

TempoCem ID

2025 REALITY RATINGS & REVIEWS Four Star Award

DENTAL ADVISOR ++++½

Aesthetic and transparent provisional luting cement

Indications: temporary luting of temporary and semi-permanent crowns, bridges, inlays, onlays, veneers and implant-supported interim prostheses

Product benefits

- Invisible below the restoration
- Identifiable for easy, reliable excess removal in one go
- Optimum transparency for the highest aesthetic results
- Optimum bonding, easy removability
- User-friendly, easy to apply
- Temporary luting, semi-permanent reliability

Pack

1 Smartmix Syringe @ 5 ml
20 Smartmix Tips Green — REF 213200

Accessories

50 Smartmix Tips Green — REF 110724

TempoCem NE

Eugenol-free, zinc oxide-based provisional luting cement

Indications: temporary luting of provisional and permanent crowns, bridges, inlays and onlays

Product benefits

- Universal use
- No influence on resin-based restoration materials
- Direct application into the temporary
- Good adhesion yet easy removal of temporary restoration
- Easy and clean removal of excess cement
- Exceptional fit through thin film thickness

Pack

2 Smartmix Syringes @ 5 ml
20 Smartmix Tips Short — REF 212104

1 Cartridge @ 25 ml
35 Automix Tips Blue 1:1 — REF 110272

Accessories

TempoCem

2025 REALITY RATINGS & REVIEWS Four Star Award

DENTAL ADVISOR ++++½

Eugenol zinc oxide-based provisional luting cement
Indications: temporary luting of provisional and permanent crowns, bridges, inlays and onlays as well as implant-borne prostheses

Product benefits

- Direct application into the temporary
- Optimal adhesion and removability
- Easy and clean removal of excess

Pack

Permanent prosthetics

Luting cements

PermaCem Universal

Adhesive, dual-curing composite luting cement

Indications: permanent luting of inlays, onlays, crowns, bridges, veneers, root posts and restorations on implant abutments

Product benefits

- Universal without compromise
- Universal use – versatile with silicate and oxide ceramics, as well as metal and composites
- Clinically proven for all common CAD/CAM materials
- First-class aesthetics in three shades with matching Try-in Paste
- Strong adhesion across a broad range
- High abrasion resistance for reliably good marginal quality and longevity of the restoration
- Simple, stress-free removal of excess cement in one step

The ideal partner for optimum bonding: LuxaBond Universal (Page 36)

Pack

1	Smartmix Syringe @ 9 g	
10	Smartmix Tips Short	
	Shade A1	REF 213401
	Shade A2.5	REF 213402
	Shade Transparent	REF 213404

Accessories

PermaCem 2.0

Self-adhesive, dual-curing composite luting cement

Indications: permanent luting of inlays, onlays, crowns, bridges and root posts, permanent luting of crowns and bridges on implant abutments

Product benefits

- An all-in-one solution
- Quick and simple to use without any etching or bonding
- Contains MDP
- A secure bond with the tooth and restauration
- Outstandingly strong adhesive to zirconia, silicate and oxide ceramics
- Minimal water absorption
- Optimum consistency
- Extraordinary flow under pressure
- Straightforward and stress-free excess removal
- Excellent radiopacity

PermaCem Dual

Adhesive, dual-curing luting cement

Indications: final cementation of crowns, bridges, inlays and onlays

Product benefits

- Reduced setting time due to light cure
- Universal use
- Also suitable for all-ceramic work
- Insoluble in a wet environment
- Low film thickness for perfect fit
- Easy removal of excess

Pack

2	Smartmix Syringes @ 10 g

Vitique

2025 REALITY RATINGS & REVIEWS Four Star Award

DENTAL ADVISOR ++++

Adhesive, light-curing luting composite for veneers
Indication: definitive, highly aesthetic cementation of ceramic or composite veneers

Product benefits

- Superior-quality complete system for veneer cementation
- Outstanding shade reproduction and shade selection
- Exact shade match between Try-in Paste and Cement
- Ultra-easy removal of excess material
- High shade stability
- Practical user support

Speciality
Your adhesive partner for Vitique as a supplementary refill pack: Ecosite Bond (Page 37)
